

VACANCY

Service Team Technician

Cergentis is a rapidly expanding genomics-focused biotechnology company based in Utrecht, The Netherlands, with the mission to improve the quality of genetic research and human healthcare. Based on our proprietary Targeted Locus Amplification (TLA) technology, we provide services and kits that enable rapid, targeted, and complete next generation sequencing of (trans)genes of interest. TLA has thereby established itself as the gold standard for the genetic characterization and selection of genetically engineered cell lines and animals. With our products, we routinely support all leading pharma, biotech and academia globally in the fields of biopharmaceutical drug development, cell and gene therapy and transgenic animal models.

Currently, we are looking for a **Service Team Technician** to support the growth and ambitions of our company.

You will be part of the Cergentis Service Team, which currently consist of 10 people. The Service Team is responsible for processing all samples provided by our customers, within a defined turnaround time. The samples originate from many different sources, making every project unique and challenging. To provide our customers with the highest quality data we work very accurate and are working according to ISO standards.

Our technicians coordinate and execute the TLA lab work, ensure correct and timely sample processing using the latest molecular biology techniques, and keep track of the sample administration. The generated NGS data will be analyzed by our project scientists and finally reported to our customers. You are expected to work independently, but communication and good collaboration within the team is very important. During our weekly meeting all ongoing work is presented and discussed.

RESPONSIBILITIES

- TLA sample processing using various protocols
- PCR
- NGS library prep and operating the sequencer
- Working with our pipetting robots
- Work according to ISO standards
- Lab journal and sample administration

REQUIREMENTS

- You have a bachelor's degree in Molecular Biology or equivalent
- You enjoy working in the lab
- You have experience with PCR, cloning, NGS
- You feel confident working with the newest technologies and equipment
- You are fluent in English
- You are a flexible team player and self-driven
- You are pragmatic, work very precise and catch on quick

OFFER

Working at Cergentis means working in an international and exciting environment with opportunities to grow and accelerate your career. We are a young and dynamic team of talented people from all over the world. Our company culture is best described as informal - where hard work and team spirit are considered very important. We offer a responsible job in a fast-growing company where you will have the chance to make an impact.

INTERESTED?

Interested? Please send your application letter and CV to vacancies@cergentis.com attn. Judith Bergboer before October 23, 2021.
