

# assembly instruction SET - frame projection screen

creative textile solutions

SET Frame module:

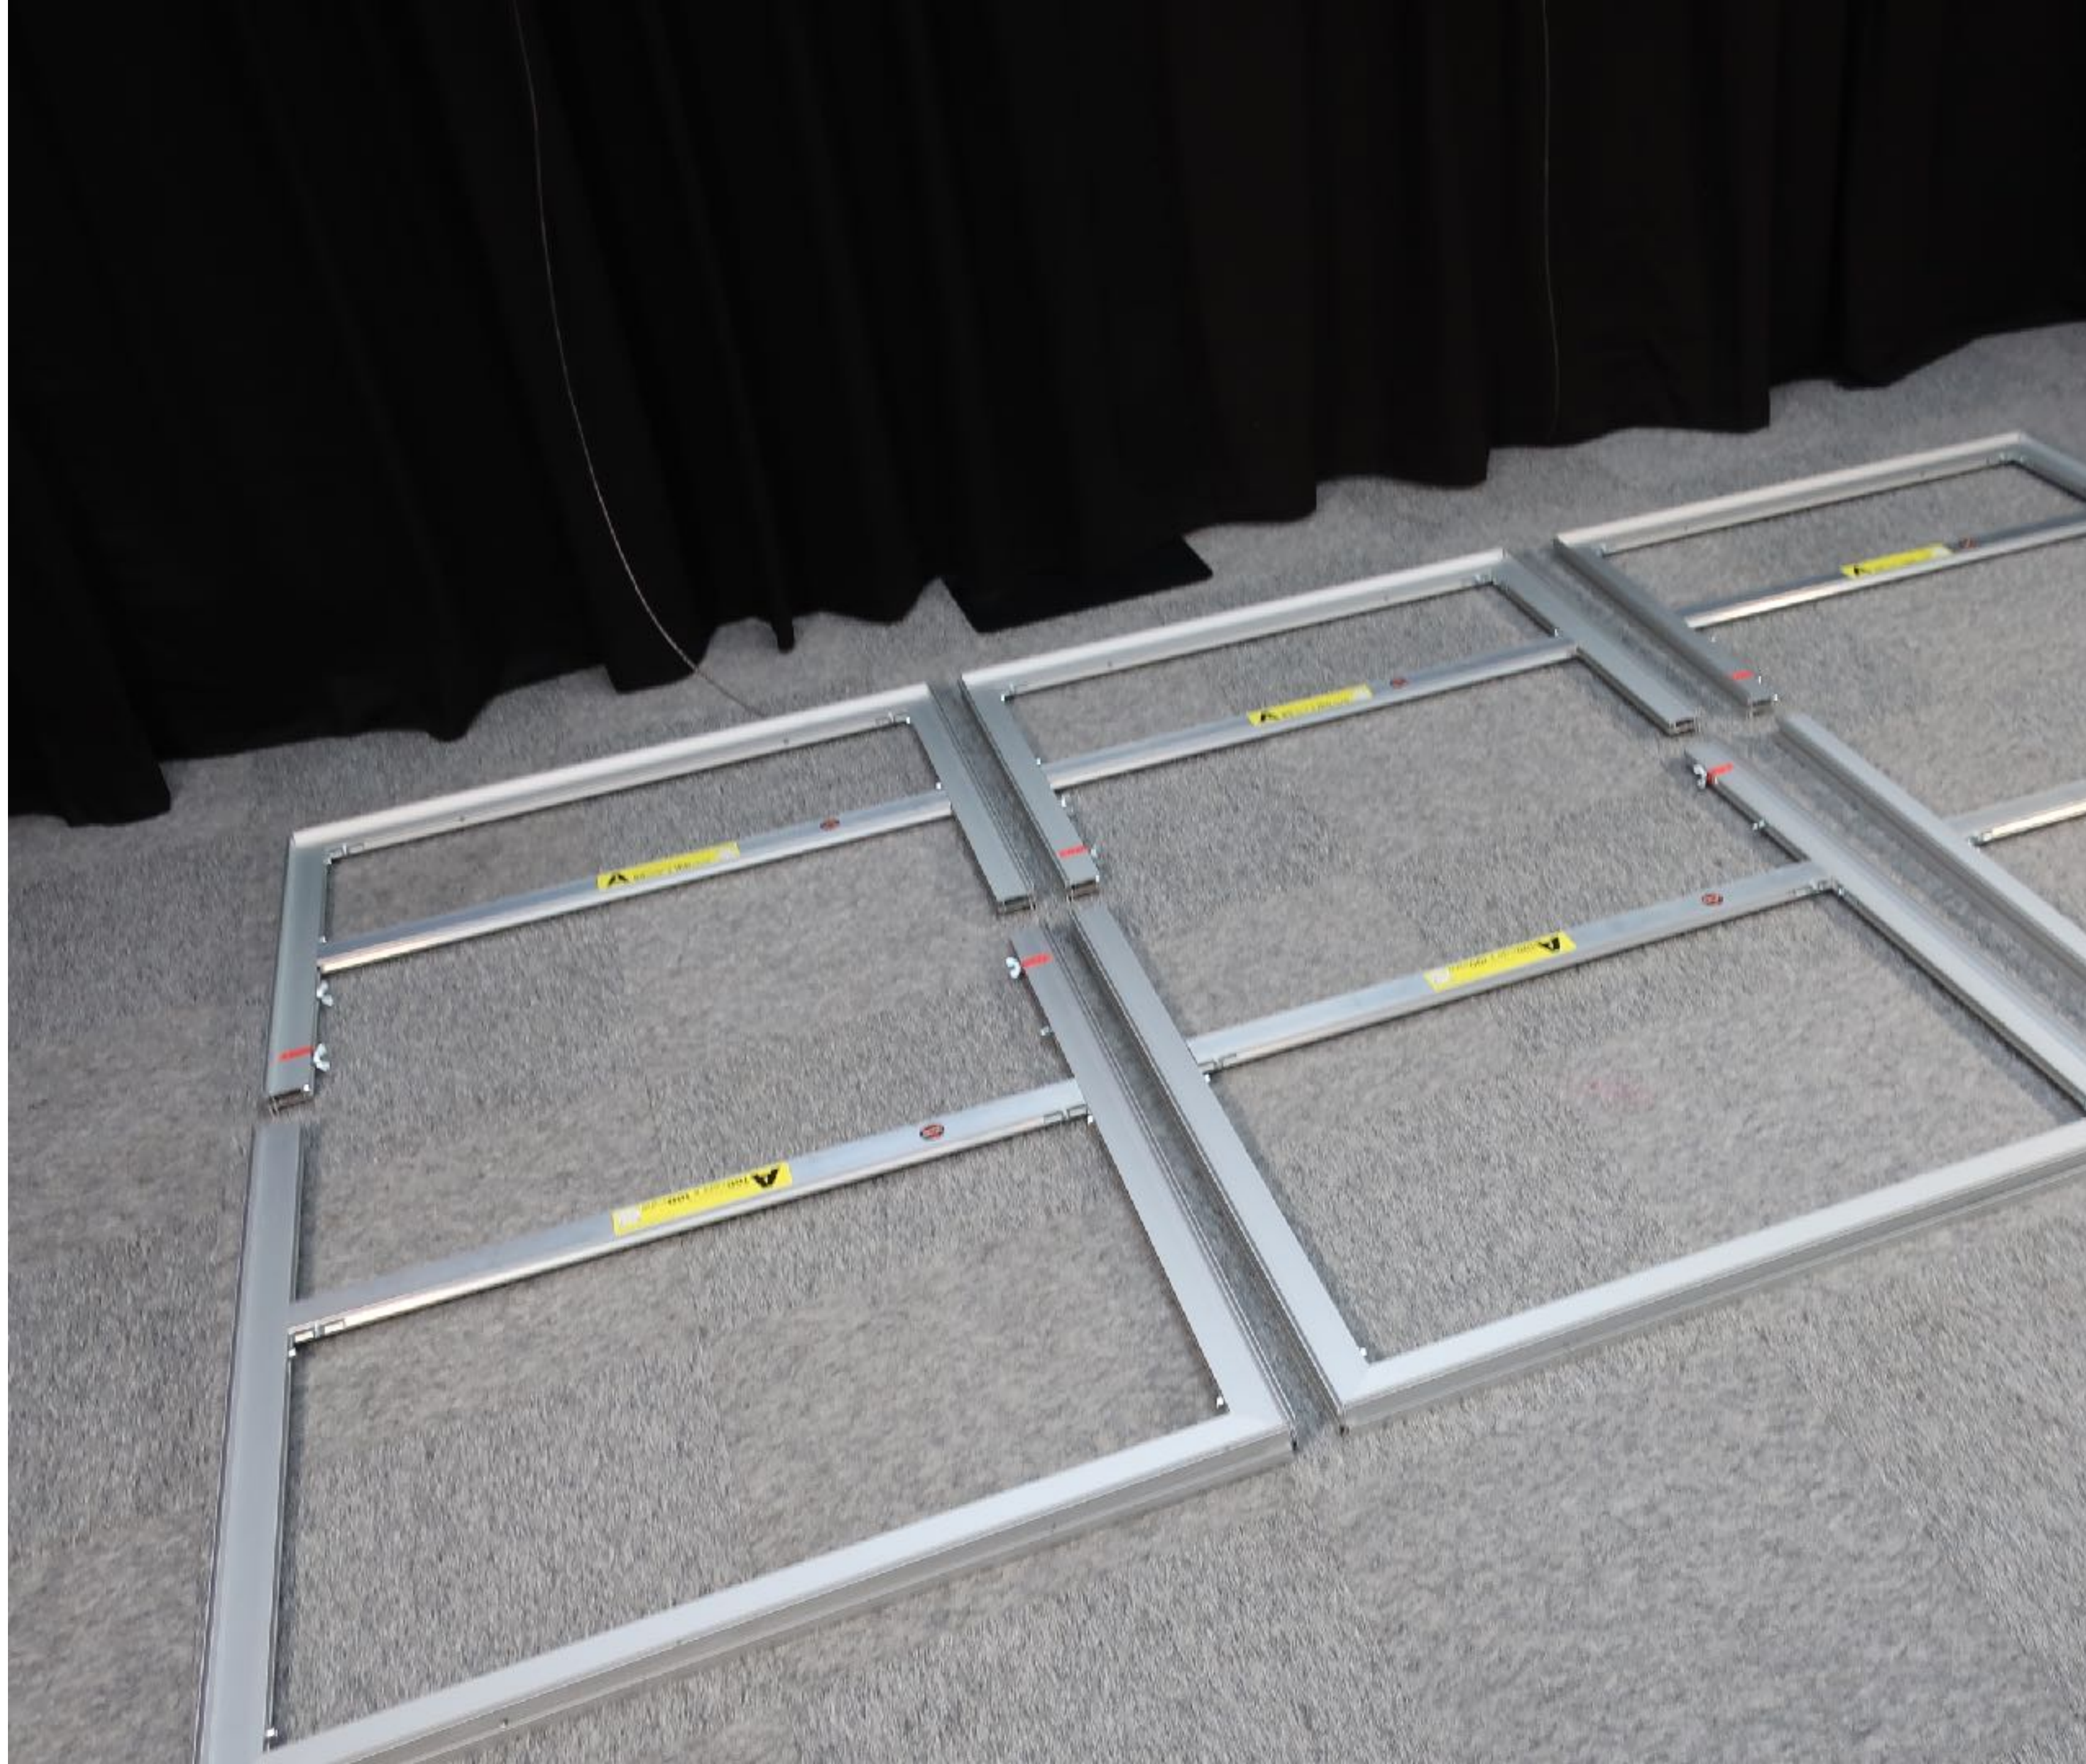

## SET FRAME PROJECTION SCREEN 3,00 X 1,69 M

**Place all necessary  
frames on the ground  
in the right place.**

**You don't need any tools.**

**Slide the A frames against each other and attach them with the module strip.**

**Loosen the wing nut and slide the strip into the other profile.**

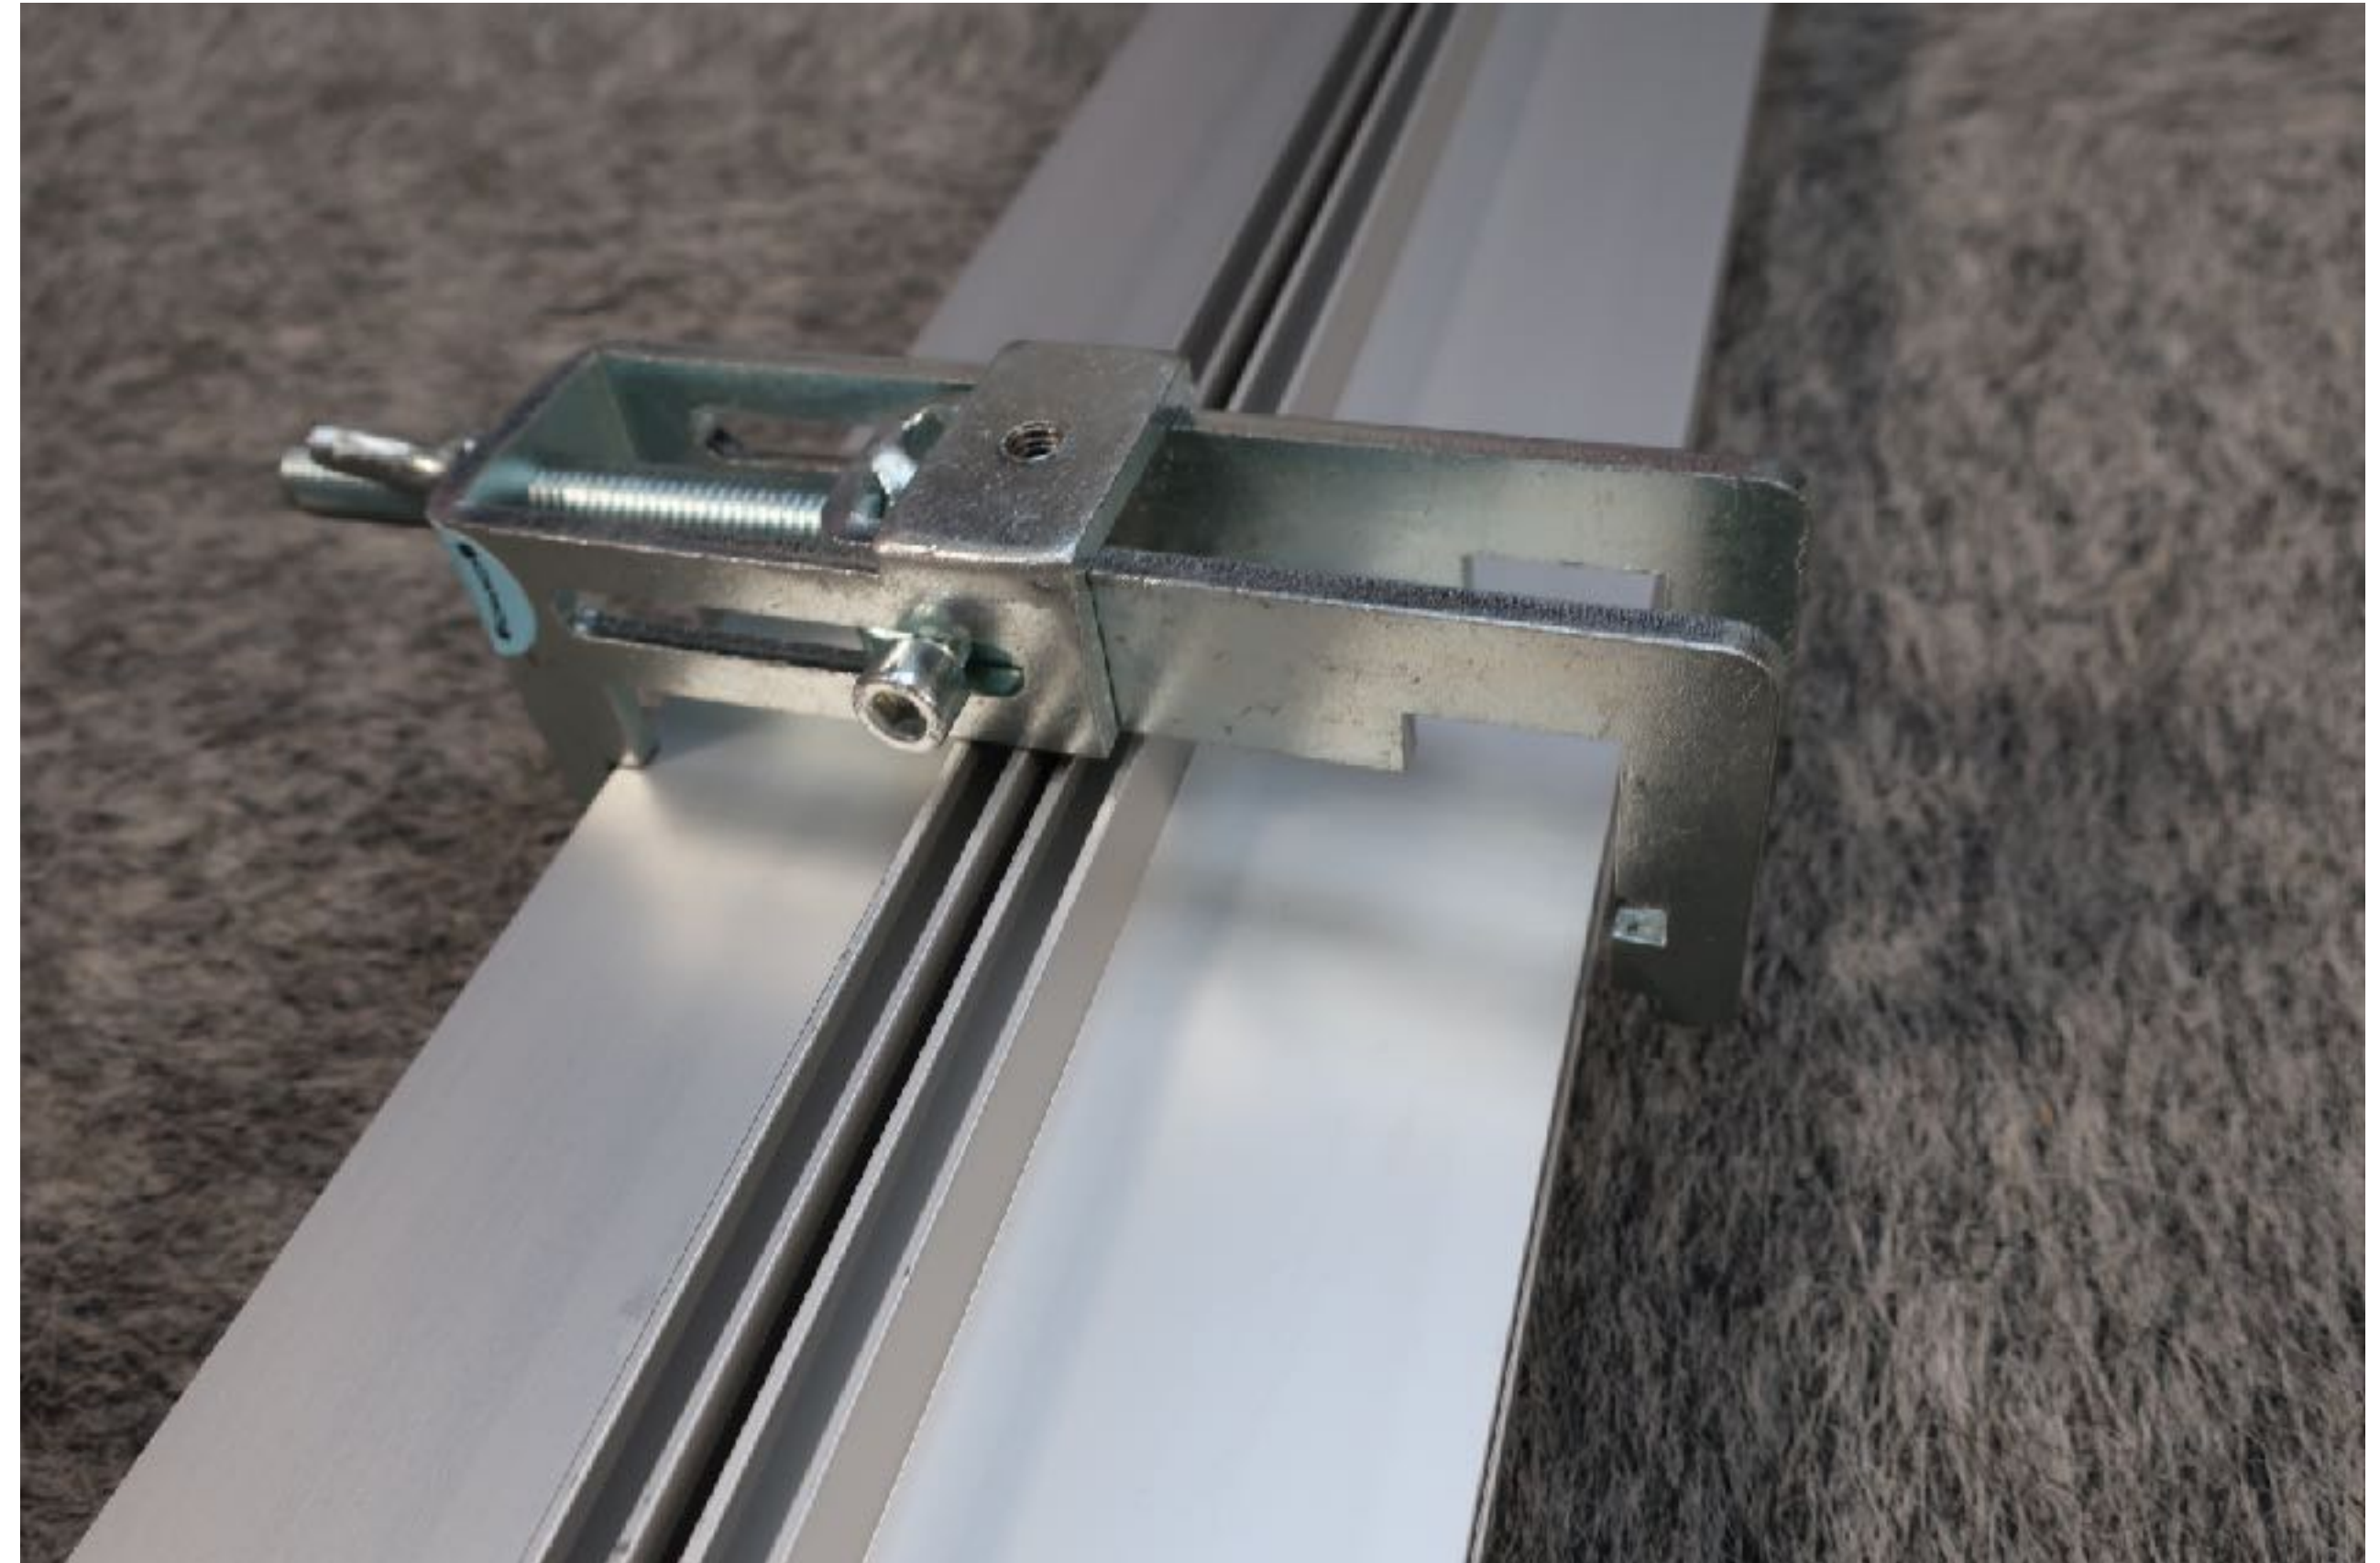

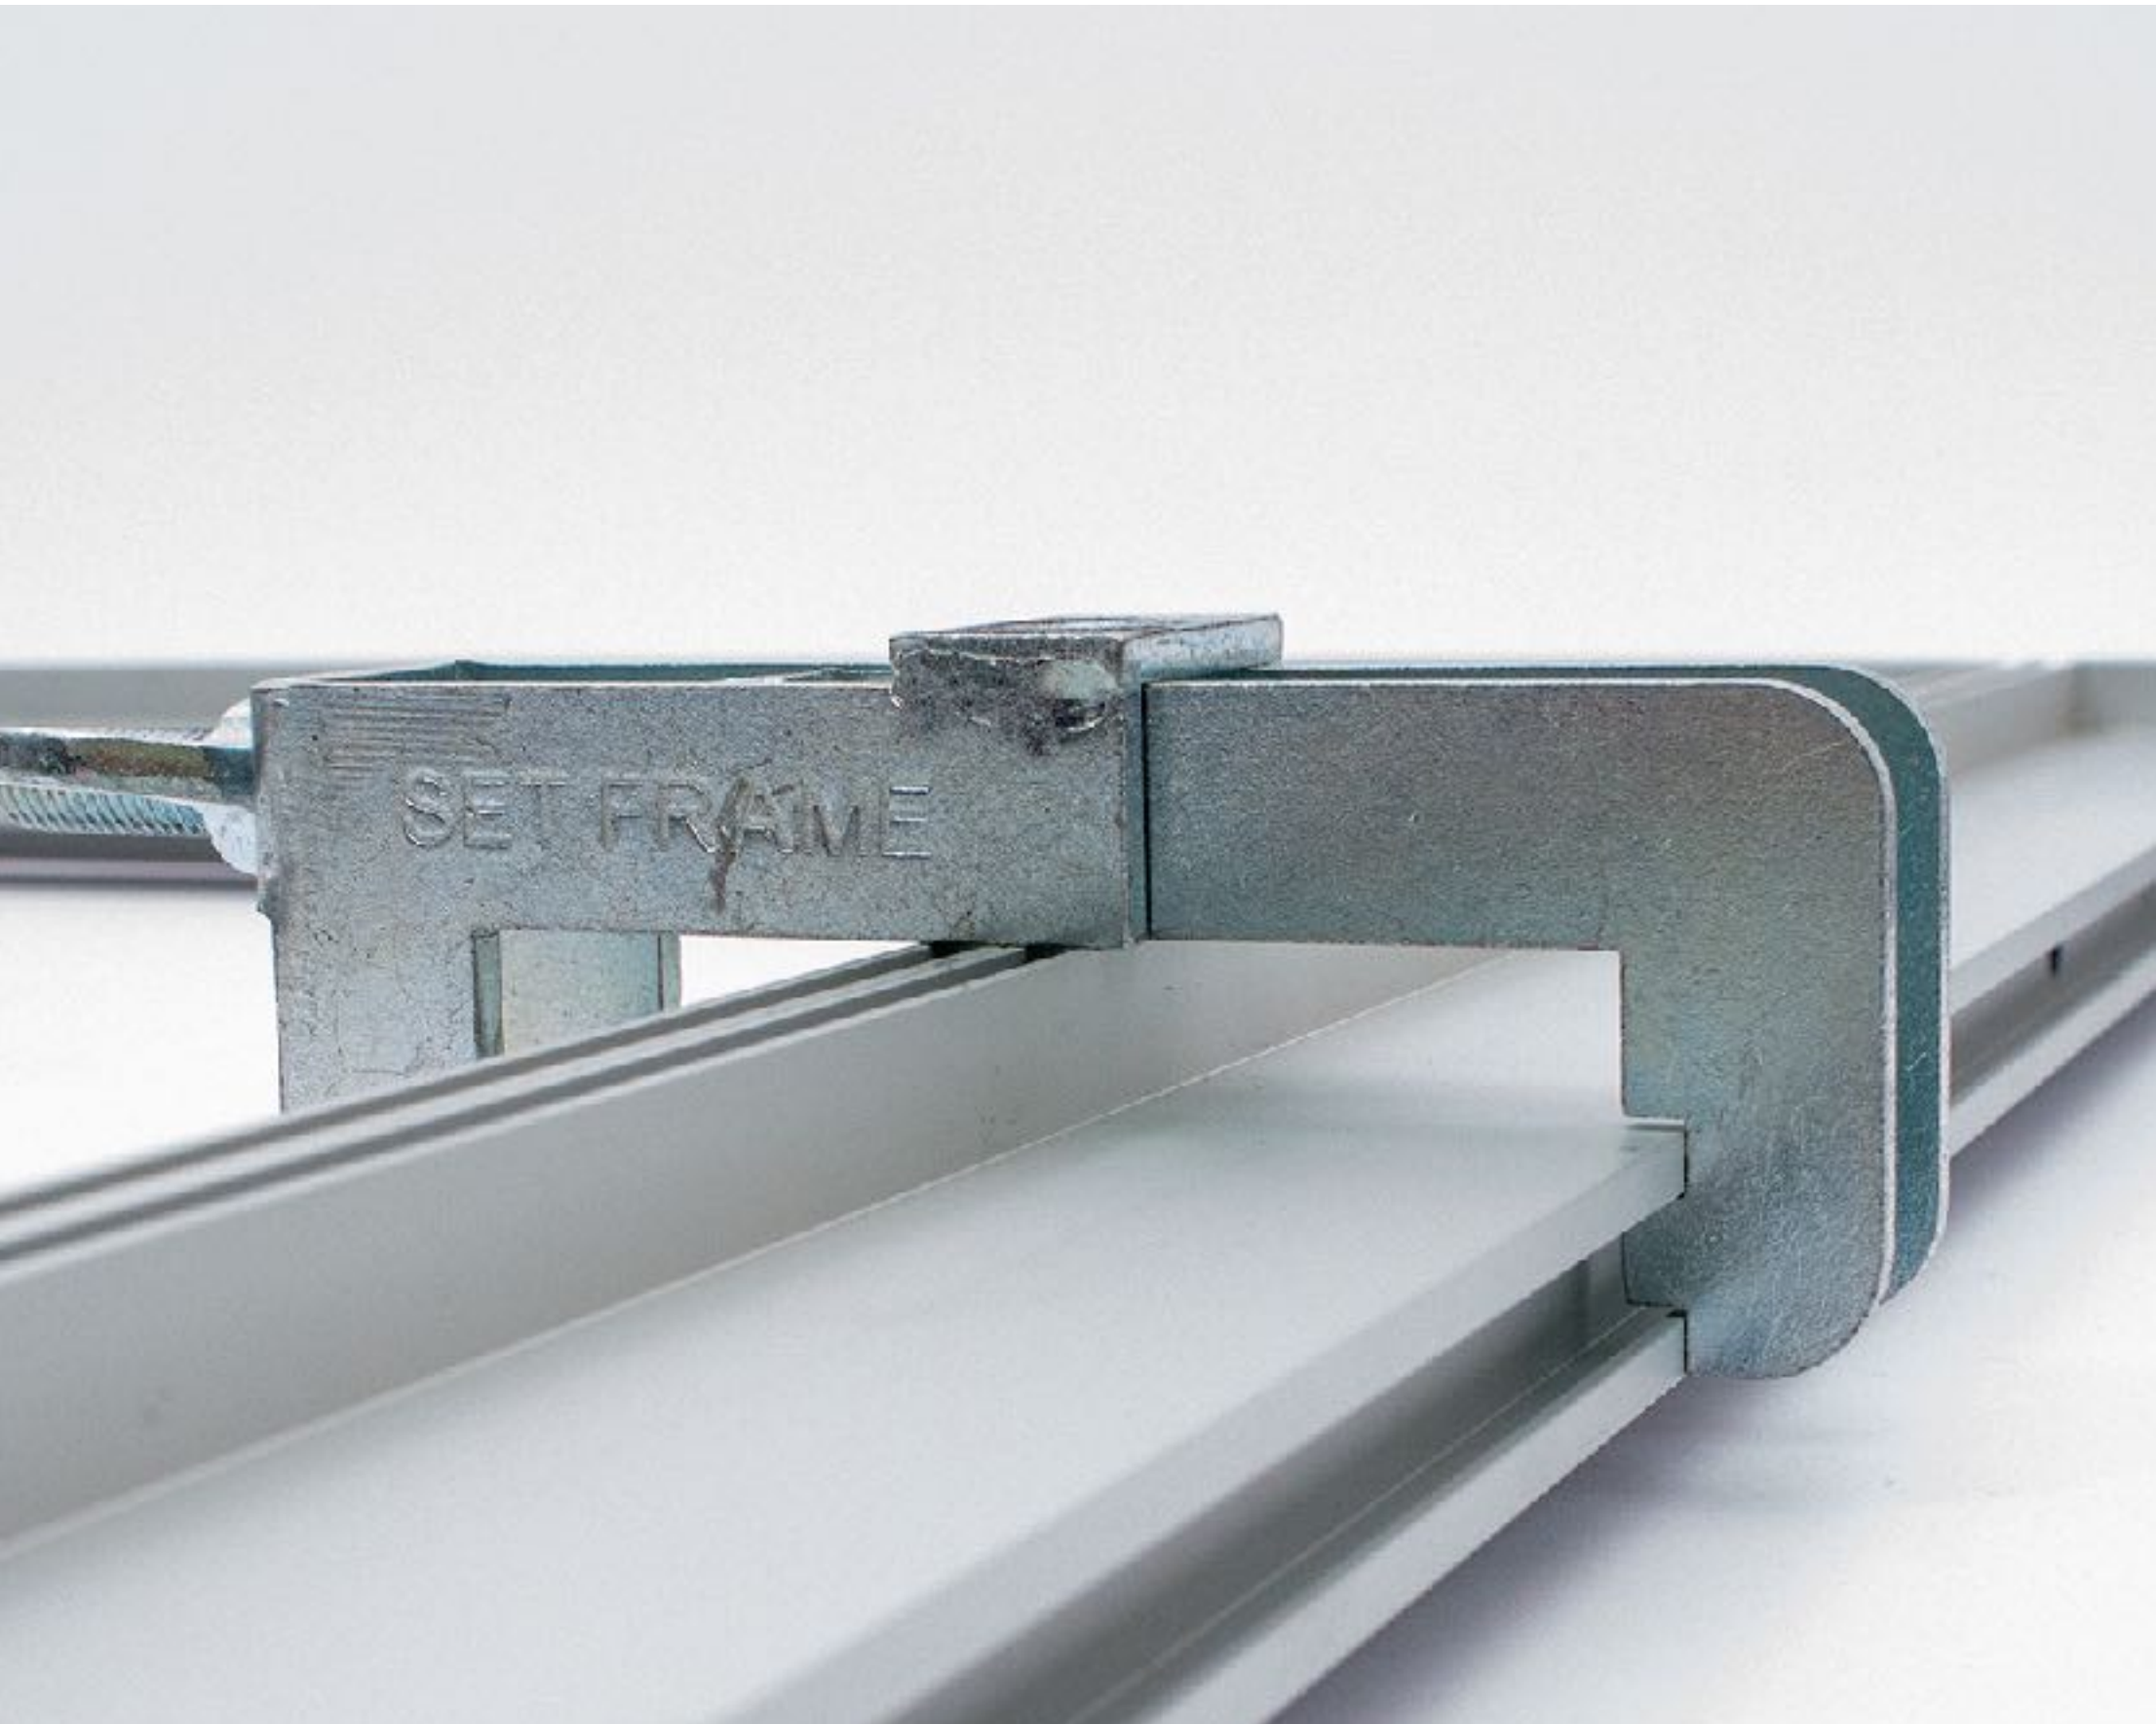

**Retighten the wing nuts.**

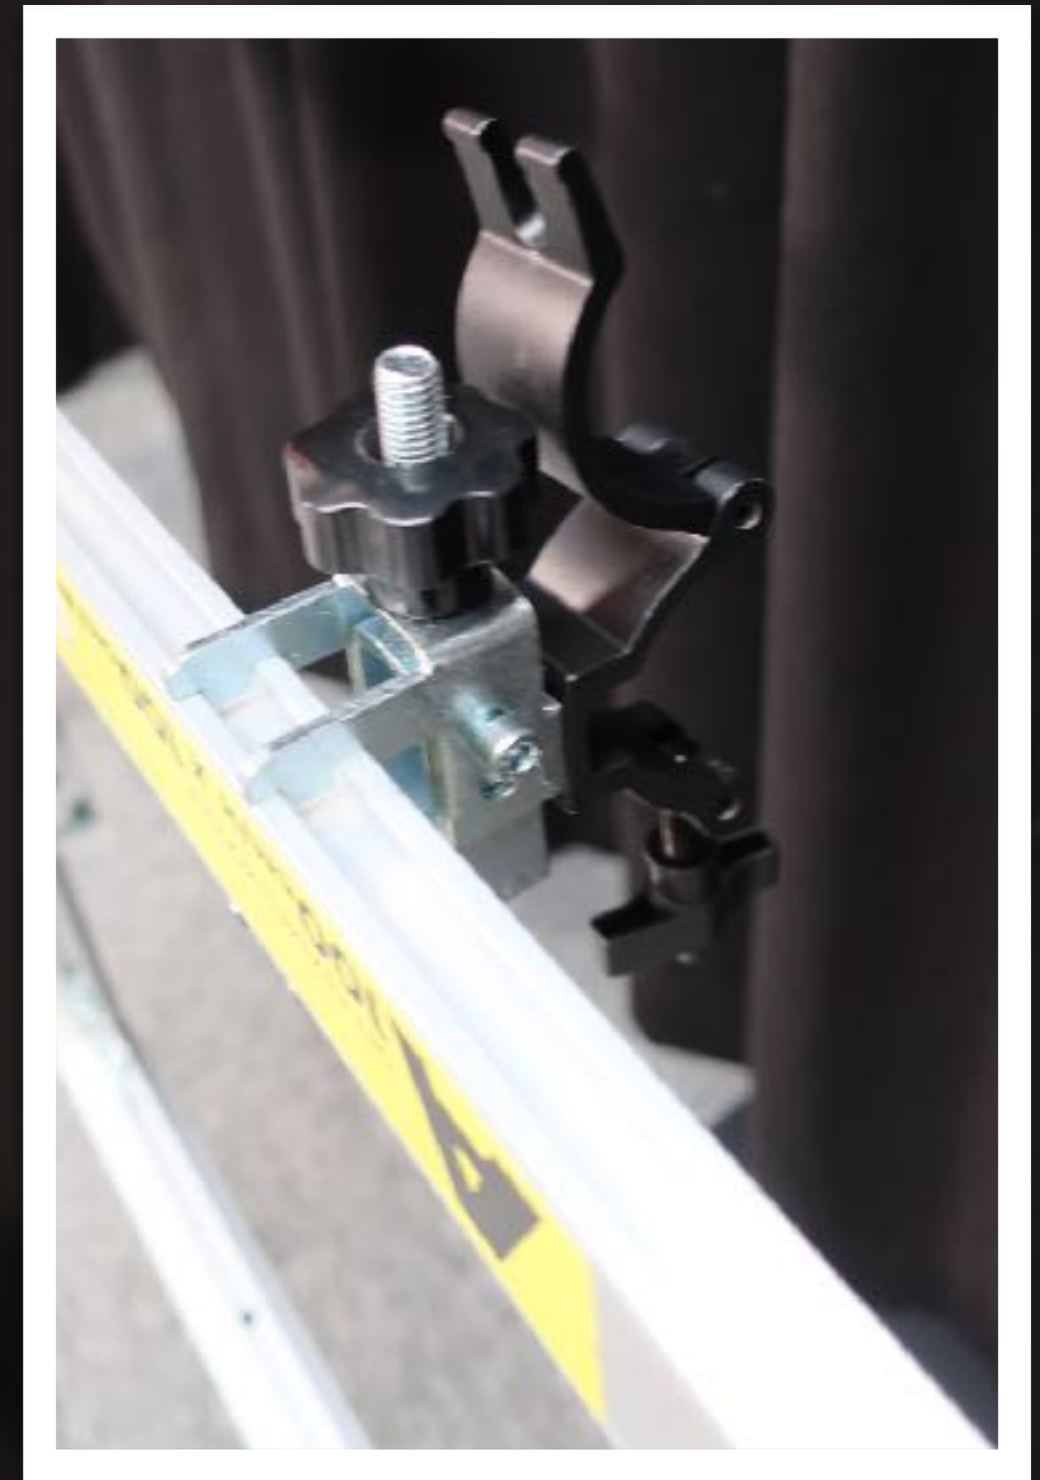

**Now attach the coupled A frames to each other with the clamp. These come at the back of the screen**

**Tighten the wing nuts.**

**Attach the reinforcement tube at the rear by attaching it with the module clamp half coupler.**

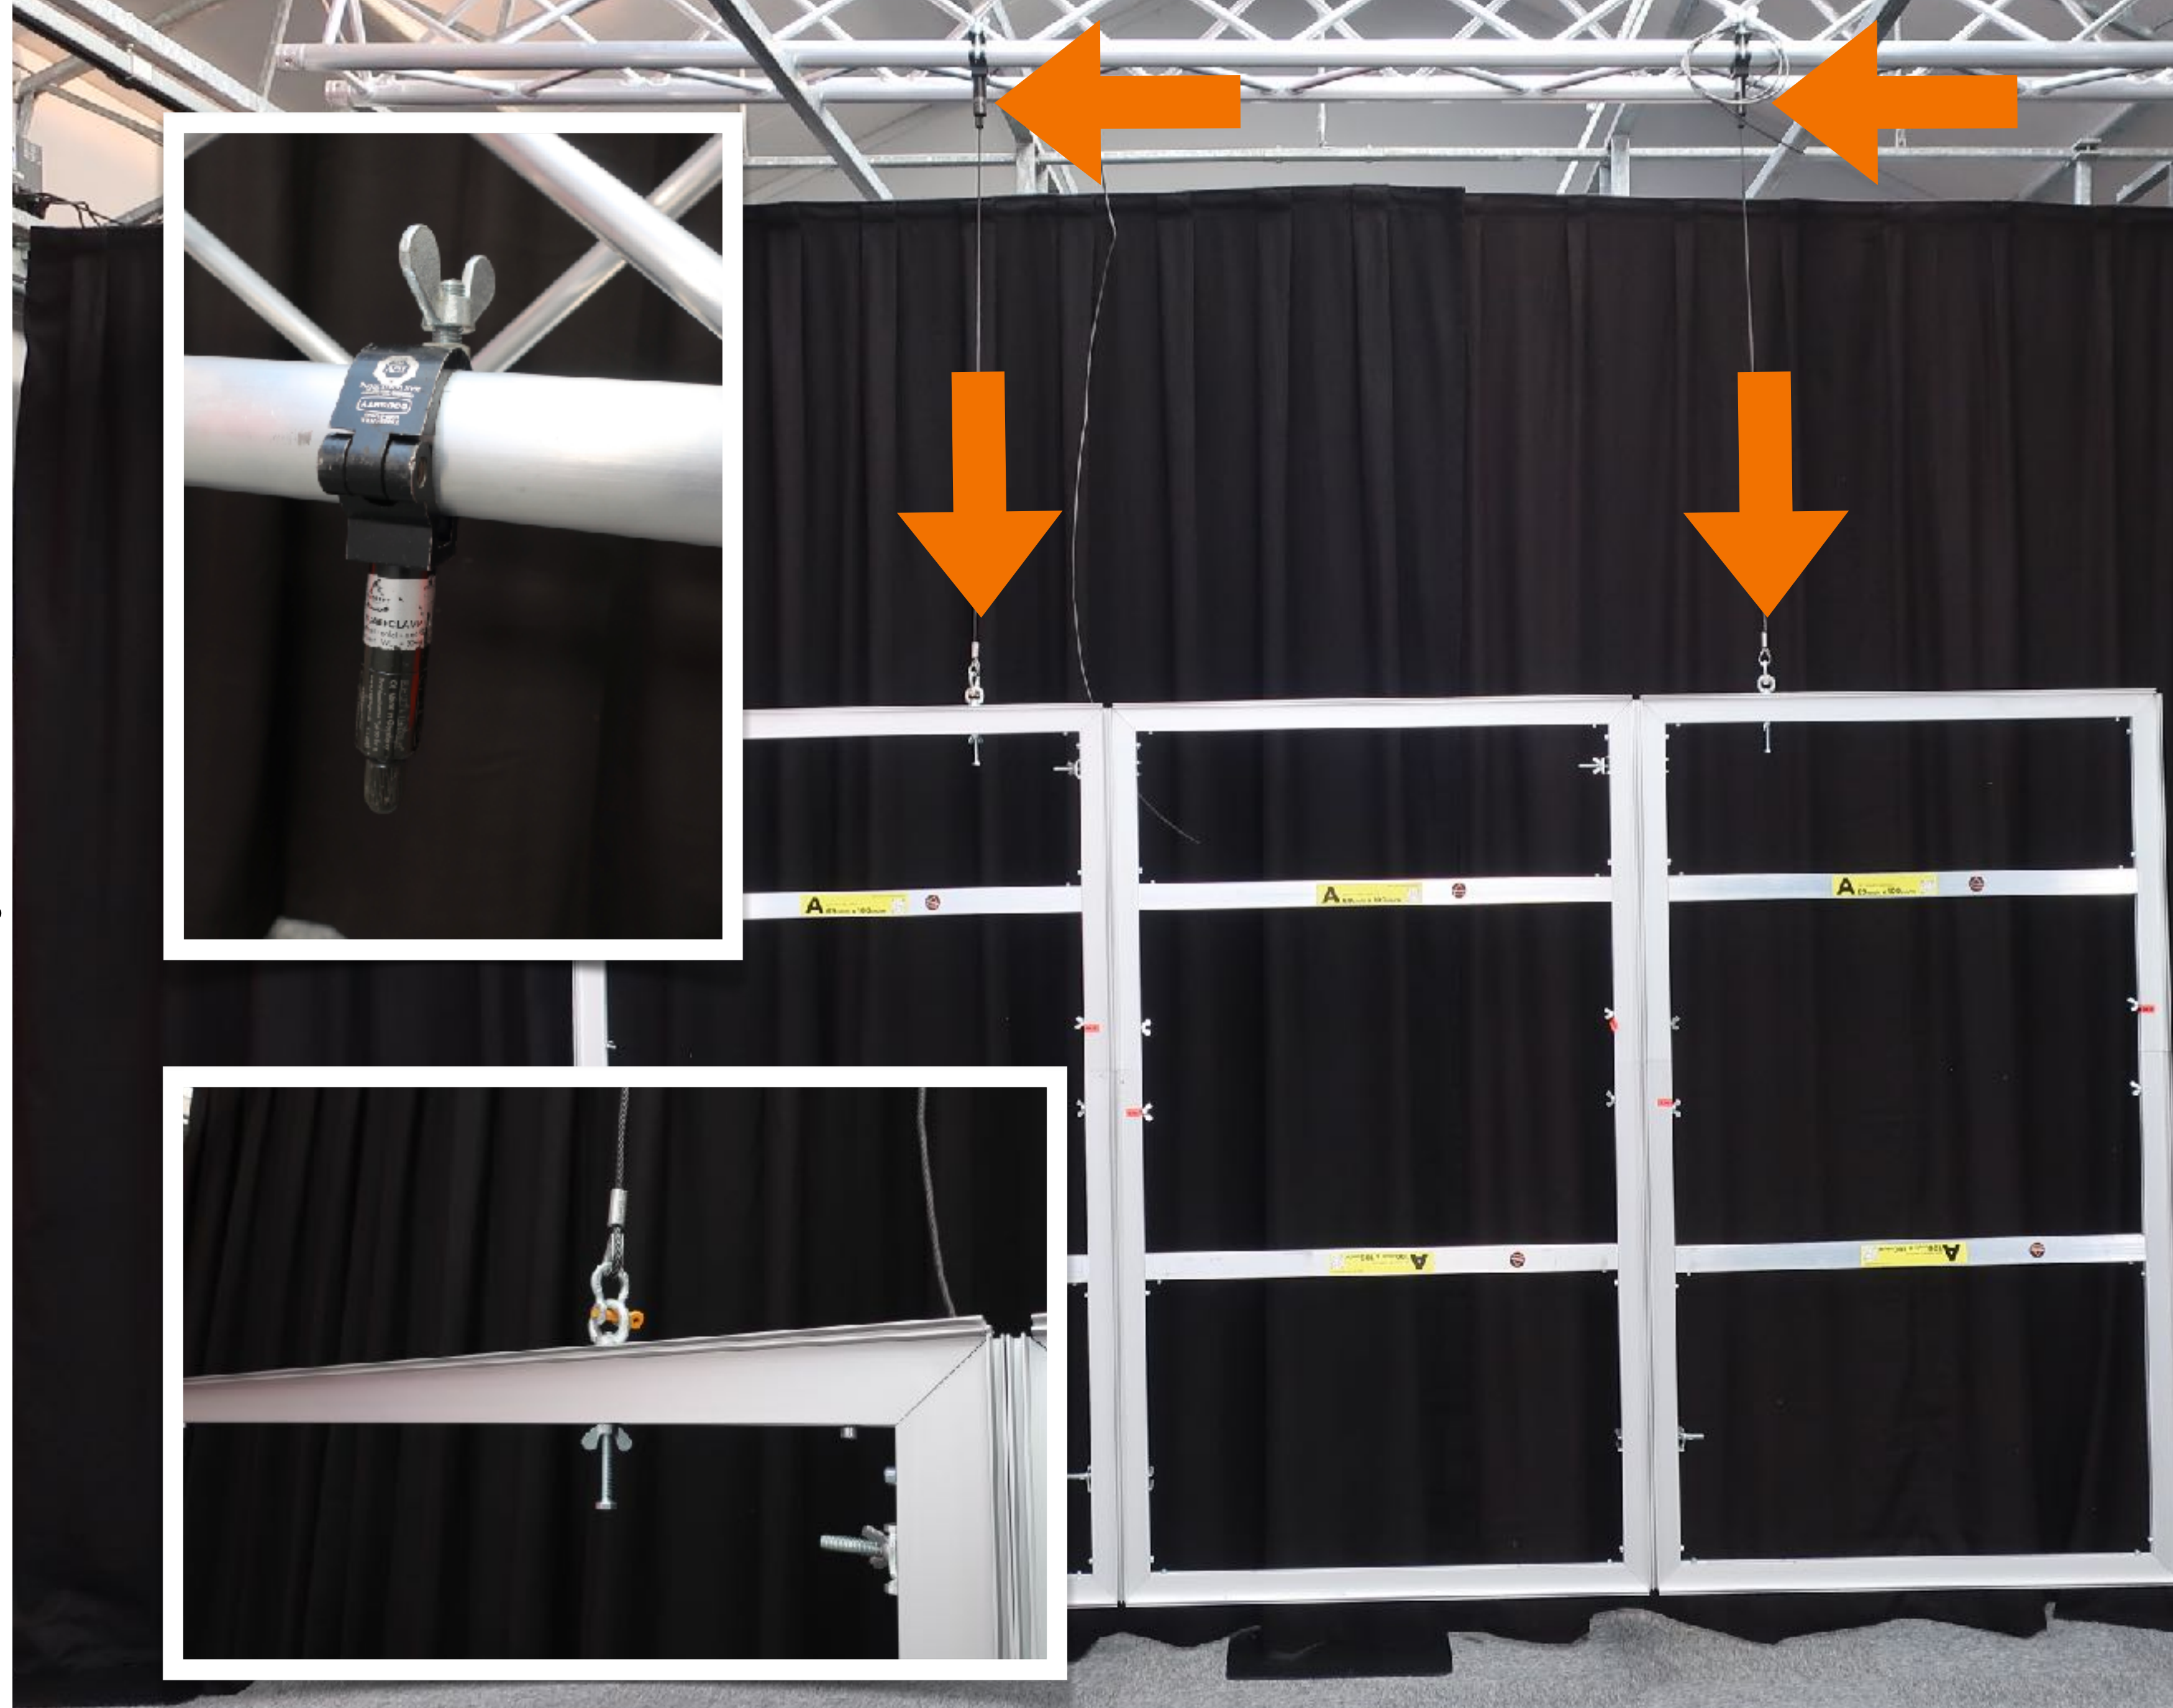

**Attach the lifting eyes at the top of the frame.**

**Attach the scaff clamp to the truss.**

**Pull the wire through in the scaff clamp the screen at the correct height and level.**

**Unfold the projection screen.  
Have clean hands, or  
clean white gloves.**

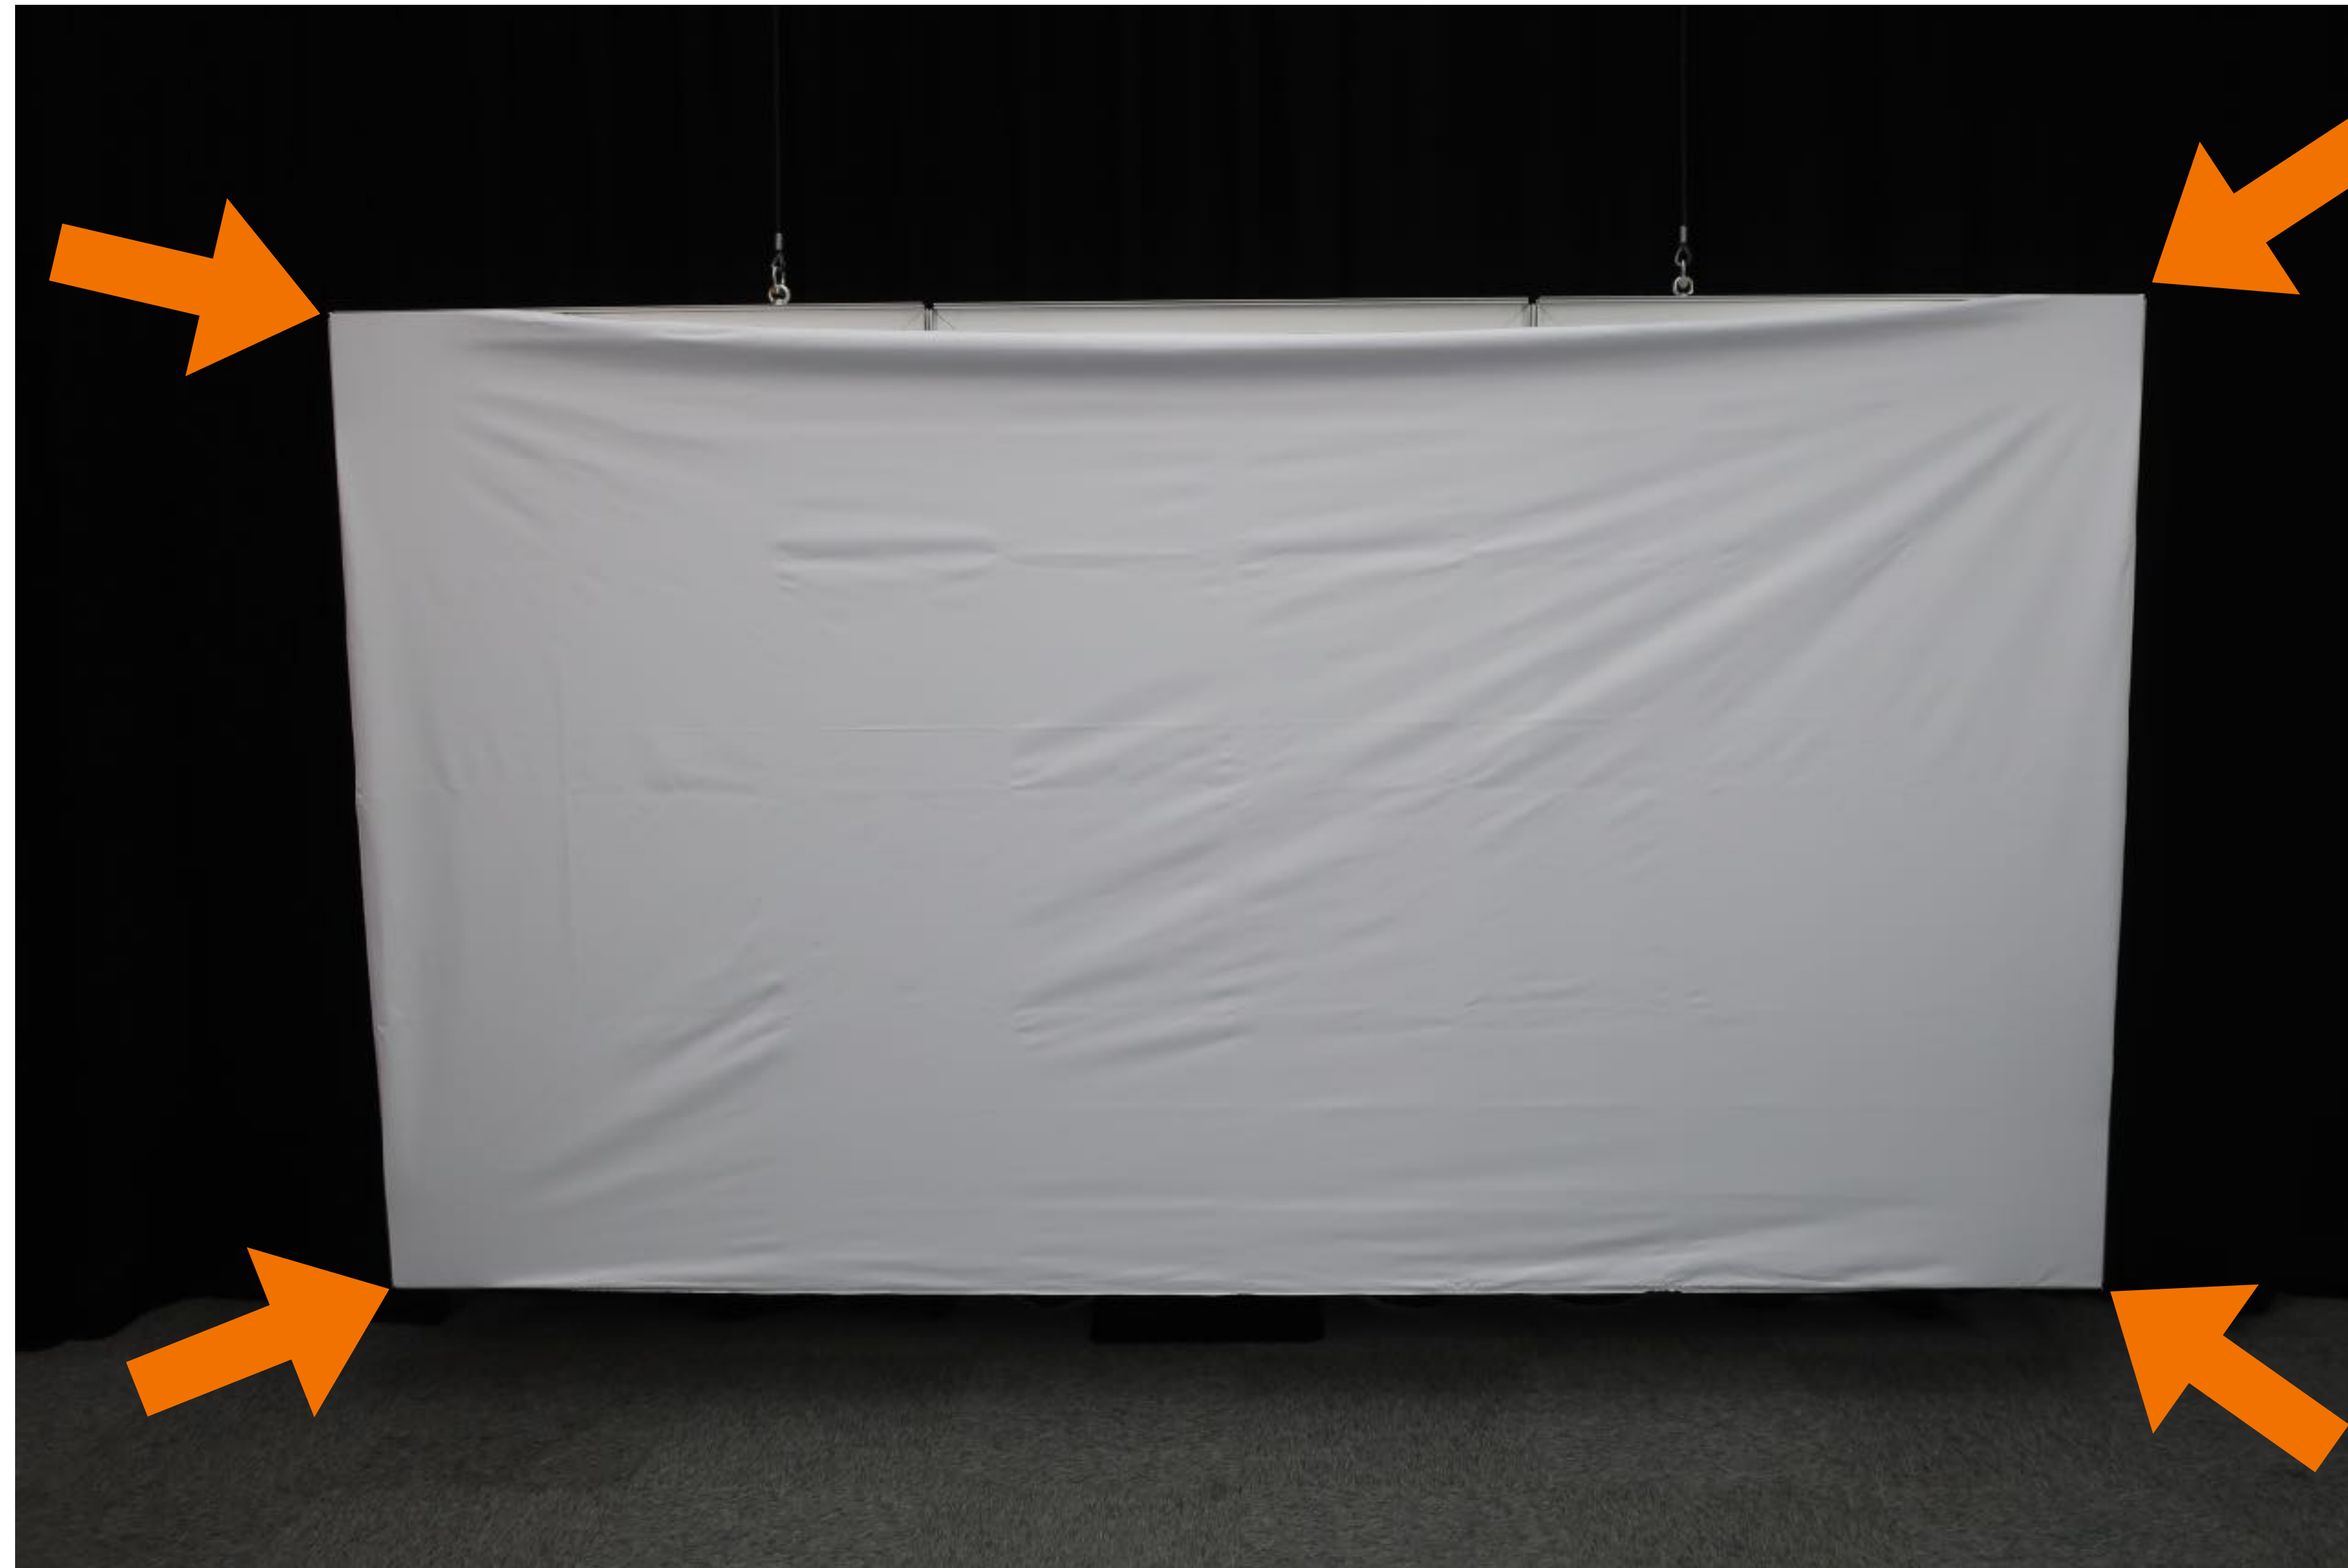

**The projectionscreen has a plastic tendon which fits in the frame profile.**

**Start with attaching the four corners to the frame.**

**Then click the screen in the middle of the four sides in the profile.**

**Then stretch the canvas in the profile from the center towards the corners.**

**The string in the profile pulls the screen tight and it is ready to use.**

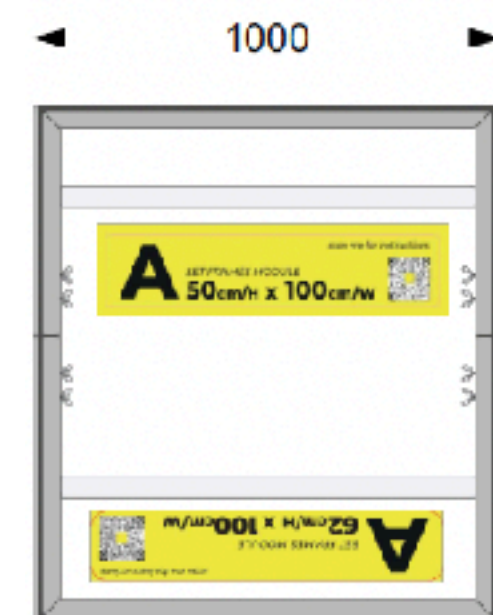

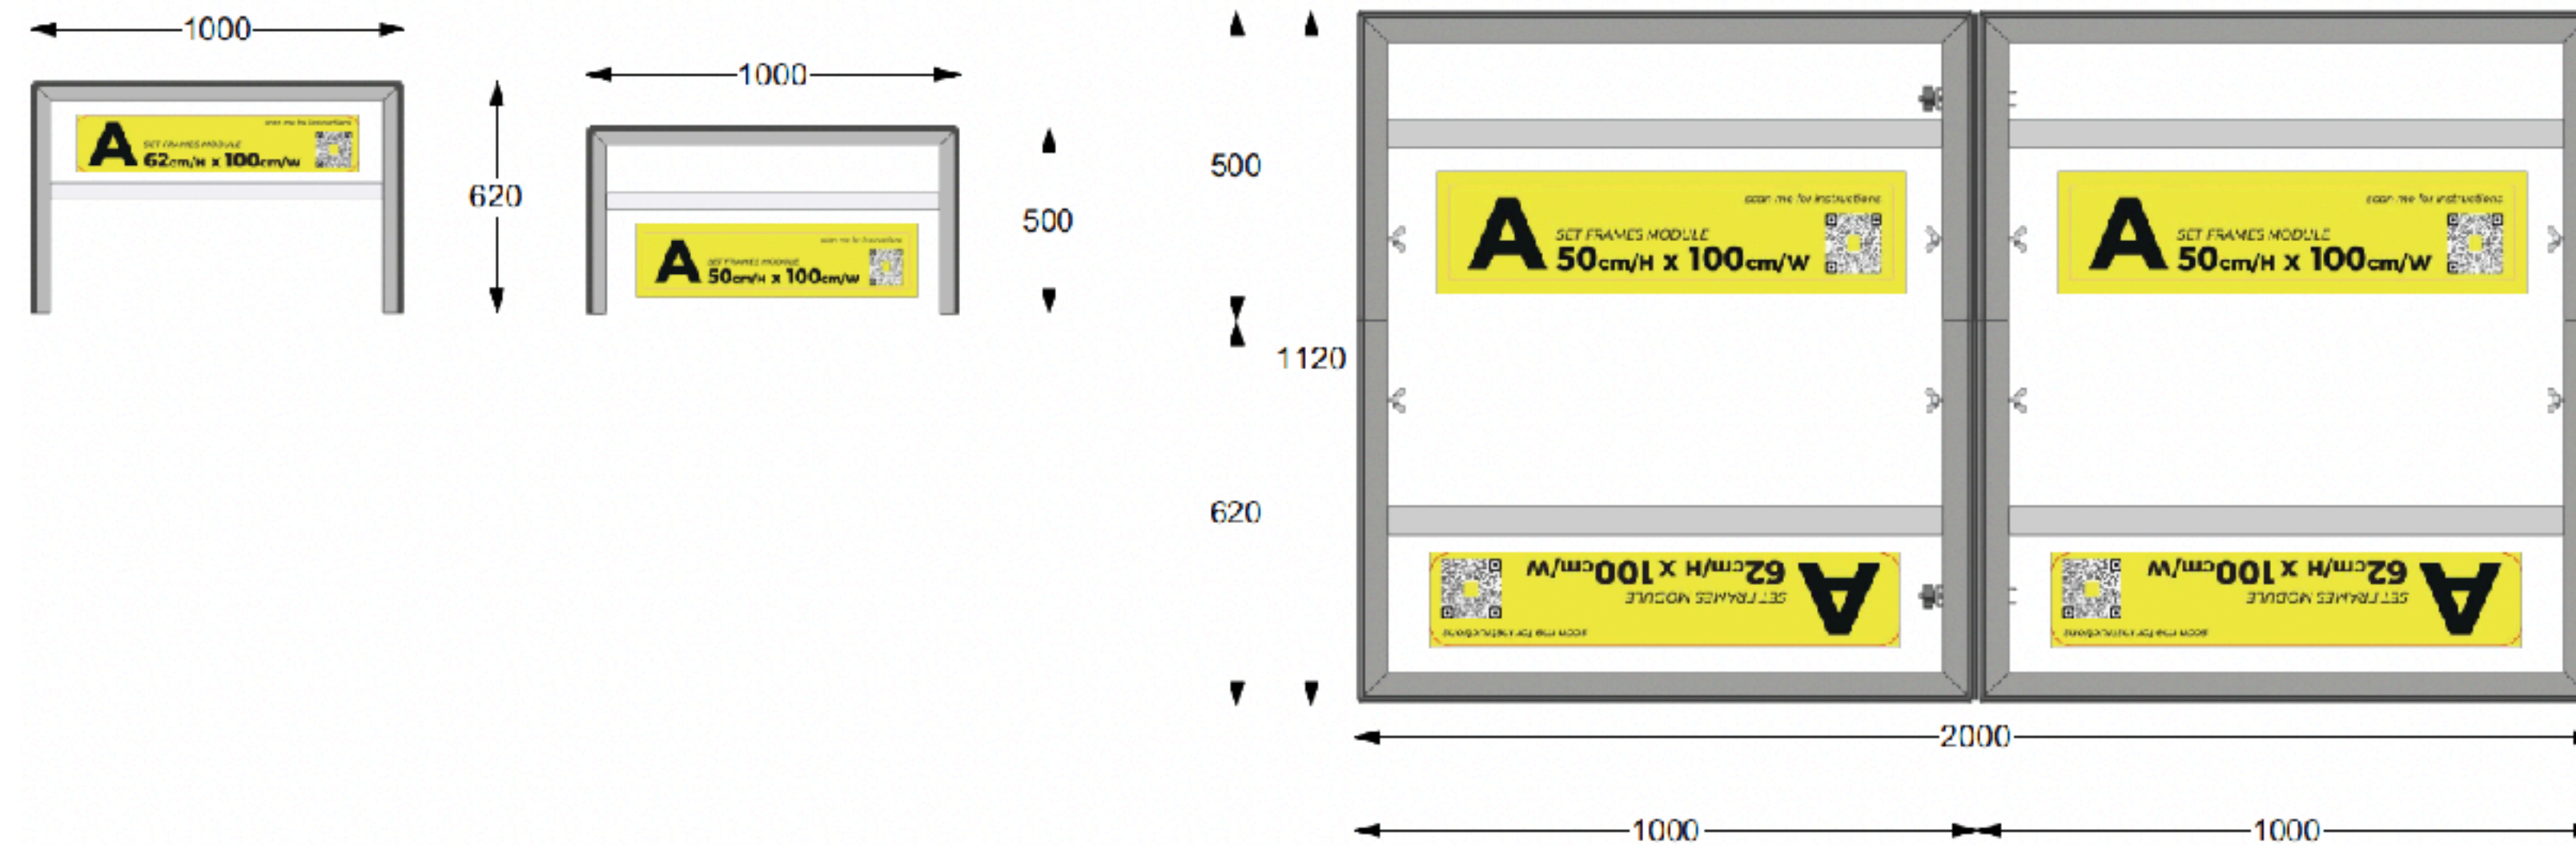

The logo features the word "WENTEX" in a bold, white, sans-serif typeface. A registered trademark symbol (®) is positioned to the upper right of the final 'X'. The text is centered within a white, horizontally-oriented rounded rectangle that has a thin double-line border. The entire logo is set against a light gray background.

**WENTEX<sup>®</sup>**
